Soft Gold LLC

22000+ clients in **120**+ countries

The Russian company Soft Gold LLC trademark CADSoftTools was founded in 2000. We create for efficient and convenient work with drawings, plans, diagrams, 3D models and other typsoftwarees of vector files. We understand that such files are used in different spheres of life, and people face different tasks, so we offer:
- CAD-applications - ready-made applications that support a large number of 2D/3D-formats;
- libraries for developers that allow to add CAD-capabilities to any application or workflow;
- online services - free online services that help, when you need to view a CAD-file or convert a PDF to DWG;
- plugins that allow you to open CAD-files in IrfanView, XNView and Total Commander.

Podarkus LLC

34000+ clients in **6**+ countries

подаркус

Podarkus is an online service that allows users to make wishlists - lists of goods and services that they want to receive as a gift or purchase.

Podarkus gives users the opportunity to make an unlimited number of wishlists and add friends to the service. You can use the wishlist not only to receive gifts, but also as a shopping list.

By adding a gift to the wishlist, the user puts a link to it in a specific online store or marketplace. When adding a link, the service automatically puts down the name of the product or service, the price, loads the image.

Friends added to the service can book gifts online and immediately purchase them. Thus, it eliminates the possibility that a person will receive the same gifts from different friends.

Satisfy Travel LLC

100+ clients in **5**+ countries

Satisfy

The company offers its own IT solutions (B2B2C), SaaS for urban, suburban hotels and other accommodation facilities. On our platform, the hotel runs the contour from the hotel application and a separate application for staff, the system is managed through a cloud interface. The system allows you to implement a seamless contour of receiving an order from a guest and setting tasks to a responsible employee: an order from a guest is received immediately by the contractor, reducing the time to complete the order. Our solution allows you to communicate with guests living in the hotel at the moment: communicate, notify them, make marketing mailings, which allows you to stimulate sales of services in the hotel.
